**2019 PROMOTIONAL
PACKAGES**

XTLtouch™

FAST, SIMPLE, SECURE

The XTLtouch delivers convenience and security:

- ▶ Easy-to-use carousel menu with standard keyboard
- ▶ Interactive shield for quick arming status
- ▶ Multiple arming configurations for your home and business
- ▶ Keypad turns red in alarm conditions
- ▶ Multiple chime sounds

Your Enhanced All-In-One Solution

You can depend on the XTLtouch wireless security system to provide professional security that will help keep your home or business safe. Packed into an elegant, 5-inch touchscreen keypad is everything you need — plus the flexibility to choose a table-top, wall-mount, or in-wall unit that your security company can install wherever it works best.

For added security, the XTLtouch has a separate wireless siren that can be installed in any location you need, and for added convenience, you also have the option of placing additional sirens and wireless keypads anywhere to fit your needs.

- ▶ Entry Check-In Protection ensures your system alerts authorities even if the panel is attacked
- ▶ Supports up to seven additional wireless keypads
- ▶ Supports up to eight wireless sirens
- ▶ Distinct fire, burglary, zone monitor, and prewarn tones
- ▶ Supports “Is this a false alarm?” and Cancel/Verify™ features
- ▶ Onboard cellular and Wi-Fi communication
- ▶ Built-in standby battery

AN INTUITIVE KEYPAD THAT’S EASY TO USE

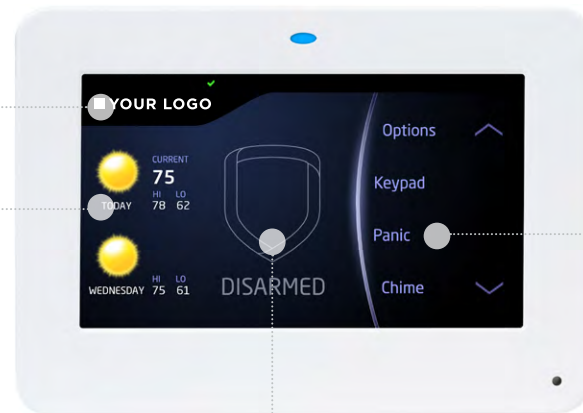

You may want additional keypads. The XTLtouch allows up to seven additional graphic touchscreen keypads, placed wherever you need them — and all with the same intuitive functionality and user experience. With only one keypad format to learn, you don’t need to be an experienced technician to remember how your system operates.

The XTLtouch gives you the flexibility to have the panel installed anywhere it works best and the keypads wherever you desire.

Animated Weather

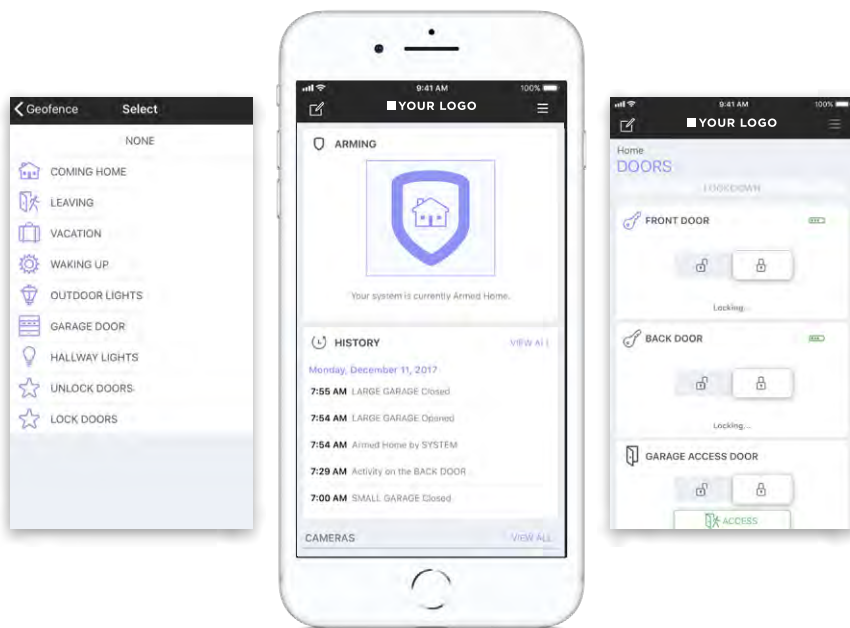

Main screen carousel menu:

- ▶ Panic
- ▶ Chime
- ▶ Reset
- ▶ Favorites
- ▶ Check-In
- ▶ Easy Exit
- ▶ Options
- ▶ Keypad
- ▶ Thermostats
- ▶ Doors
- ▶ Lights
- ▶ User Codes
- ▶ Schedules
- ▶ Events

Tapping the shield provides an arming options screen.

When the user opens an entry door, the keypad screen asks you to enter your code to disarm.

“IS THIS A FALSE ALARM?” OR CANCEL/VERIFY

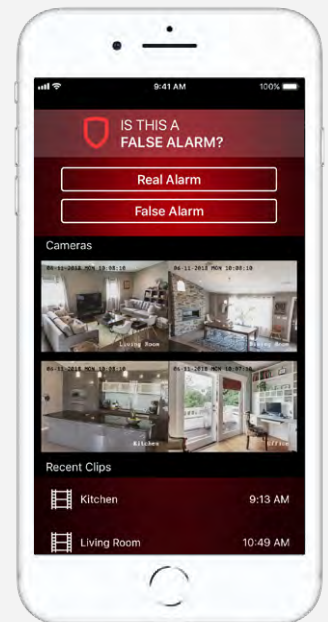

In a Home/Sleep/Away or All/Perimeter system, you can cancel a burglary alarm or verify that a valid burglar alarm has occurred.

You can also answer whether it is a false alarm with yes or no. Selecting verify or yes manually verifies that an alarm occurred and sends an alarm verification message to the monitoring center.

REMOTE SYSTEM CONTROL

DMP's Virtual Keypad™ app allows total remote control of your residential or commercial system from wherever you are with your cell phone, tablet, or computer.

- ▶ Turn the system on or off and receive alerts any time there's a change in the system's status.
- ▶ Add and delete users to help manage users.
- ▶ Control much more than just the security system by adding Z-Wave® devices and turn a smartphone or tablet into the ultimate remote control.
- ▶ Turn lights on and off.
- ▶ Control thermostats to reduce energy use.
- ▶ Lock and unlock doors manually or automatically.
- ▶ Use geofencing to get arming reminders.

VIDEO SERVICE

Keep an eye on things, no matter where you are.

- ▶ Add cameras, interior and exterior.
- ▶ View live video on your smartphone or tablet.
- ▶ Receive video clips when motion is detected.
- ▶ Schedule a recording.

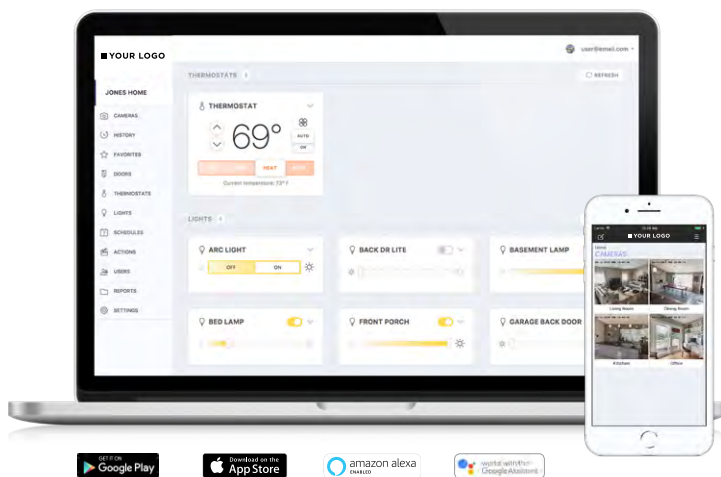

CUSTOM ACTIONS

In addition to controlling lights, locks, and thermostats, users can also take advantage of up to 20 customizable actions that can be programmed into the XTLtouch. Now users can select a combined sequence of actions, all based on specific Favorites, Lights, and Locks to activate or deactivate Z-Wave devices, Favorites, or outputs during specific times and days or specific zone trips.

Virtual Keypad™

Don't settle for just any security system. The XTLtouch is your complete solution that's fast, simple, and secure. Call us today or visit guardtronic.com/builder to learn more.

Add Cameras

to remotely access interior or exterior cameras. View live images, record video or access video clips via your app on your phone or tablet, or any Internet-connected computer. View live video and clips, record and download clips. Keep an eye on seniors, front porch and sensitive areas.

Home Automation Favorites take the convenience of home automation to the next level with the Favorites feature. Program several Z-Wave devices to work together with a single tap on the app or your keypad. Create multiple favorites for different activities or moods. Lock doors, dim lights, adjust the thermostat, and more, all with one tap or touch of your smart phone. Favorites can be integrated into your alarm system to allow garage doors to close, doors to lock, lights to turn off, and thermostats to adjust upon arming your system. Your system can also be programmed to turn lights on during a fire, unlock doors and other actions for added safety in an emergency. It's the ultimate control for home security.

The Automated Home Home automation features are now affordable with Z-Wave modules. They let you create a customized home automation system that adds both convenience and security. And all of these remarkable features are made possible through your existing security system.

Contact your security professional to talk about how you can add automation features to your home.

DISCOVER THE
CONVENIENCE OF
[**REMOTELY**]
ACCESSING YOUR HOME DEVICES

Your home security system already does so much for you; protecting your family, home, and possessions. But it can do much more. With the addition of some easily installed devices, your security system also becomes the heart of a home automation system.

L I G H T S

You have many options for automating home lighting. For plug-in lamps, simply plug a Z-Wave module into any outlet and then plug the lamp into the module. There's also a Z-Wave wall switch that replaces your conventional light switch.

There's even a Z-Wave LED bulb that just screws into any existing fixture. There are options for standard and incandescent lighting, and several of the modules offer the ability to dim the lights.

L O C K S

Easily replace your existing exterior deadbolt locks with attractive, wireless, remote-control locks.

Your security professional can program your alarm system to work in concert with the lock. You can also use the six-button keypad on the lock for keyless entry. Z-Wave locks add security and peace of mind. When you arm your system at night or when you leave in the morning, the alarm system can tell the door to automatically lock. Now your alarm system doesn't just warn you when someone tries to break in; it plays an active role in keeping intruders out.

A P P L I A N C E S

The same plug-in module used to control lights can also be used to control many appliances or other electrical devices. If it is plugged into a wall socket, then you can turn it on and off remotely via your security system.

T H E R M O S T A T

Your security system can also save energy with the addition of a Z-Wave thermostat. Create customized schedules for every day of the week, turning the temperature up and down at the desired times each day. You can also have the system programmed to automatically adjust the thermostat when you leave or arrive home. The Thermostat works with all standard heating/cooling systems and heat pumps.

G A R A G E C O N T R O L L E R

This Z-wave device lets you integrate garage door control with your security system, allowing you to open and close the door remotely as well as check the status of the door.

Total remote control. If you can do it from your system keypad, you can do it via the app on your phone, tablet or computer. It's the ultimate in remote control.

Never worry again about whether you locked a door or armed your security system. Check the status from wherever you are. Lock your exterior doors and close the garage whether you're in the living room, bedroom, or from across the country.
